

Forklift Magnet

Description: The Greenwood Forklift Magnet is specifically manufactured for forklift trucks to any width required. The forks slide into the top mounted brackets which easily lock manually. Ideal for keeping car parks, container depots and warehouses free from nails, swarf, nuts and bolts, etc. Once the cleaning operation is complete, the magnet can be removed for using at a later date.

Brackets are bolted manually onto the forks

Features

- Robust design
- Easy to fit and bolt on manually
- Magnetic surface easily cleaned manually
- Corrosion resistant

Specification

- 4" wide magnetic face
- Will pick up contamination from 4-5"
- Manufactured to any width required
- When ordering, please specify fork width and centres for fixing purposes
