

Magnetic Sweeper

Description: The Greenwood Magnetic Sweeper is designed to provide a fast and efficient method of keeping floor space free from numerous small ferrous metal objects such as nails, swarf, tacks, nuts and bolts. The sweeper is manufactured from stainless steel housing and is fitted with two large robust rubber wheels with puncture-proof tyres. The direction of the sweeper is controlled by a long tubular steel handle which can be dismantled.

Features

- Robust yet lightweight design is easy to handle
- Magnetic surface is easily cleaned manually
- Effective and consistent performance due to high flux density
- Corrosion resistant

Specification

- Magnet strength - will pick up ferrous metal objects weighing 12 grams against gravity from a distance of 85mm (12 grams is equivalent to the weight of a standard 100mm long nail).
- Manufactured in any size to suit customers requirements
